

CREATE A GREEK DEITY'S TOOL PROJECT

Create for one of the gods/goddesses an item which depicts something he or she is known for having or using. For instance, create winged sandals for Hermes, a shield for Athena, a lyre for Apollo, etc.

Your Task: For this project you will need to research a variety of gods/goddesses to determine the tools that are most-related to that particular individual. Try to find descriptions of what the tool looked like.

1. Decided on a tool to re-create.
2. Determine how best to re-create that particular item so that it would have the true-appearance of a Greek item.
3. Use your imagination and creativity in completing your project.

Presentation

- Your completed item will be your presentation.
- Be sure to complete a note card that identifies what the item is, which god/goddess would have this item, and what special powers it may contain.
