

## MODERN DAY GREECE PRESENTATION #7

#7. Create a media presentation which features at least five famous Greek mythological structures one could still see today in modern Greece.

**Your Task:** For this project you will need to conduct research into locating Greek mythological structures that are still in existence today in some area of what was once Ancient Greece.

Your presentation should consist of a number of slides which feature what the structure may have originally looked like and of course, how it looks today. You will also need to explain how the structure may relate to the Greek mythology by answering the following:

1. Which god/goddess was the structure originally intended to honor?
2. Where is the structure located today (city)?
3. Approximately when was the structure built?
4. What may have been the original purpose for the structure?

The presentation should not just be of “copy and paste” content. You will need to properly cite all material that you have taken to include in your presentation. A proper citation is not just a listing of the URL addresses. Use Cite.com to assist you with your citing process.

### Presentation

- **Be sure to save your presentation properly.**
- **You may post your presentation to our Google Classroom.**
