

Diorama Project

This project will consist constructing a diorama that represents a key scene from the play. Use an ordinary shoe box. Add at least 10 unique items in which to reconstruct the scene. It should be obvious what the scene is that you are representing.

If you are struggling with the building of the diorama or figures, there are many online websites available to assist. Remember to keep the diorama scene true to the time period of 1843.

Avoid using Legos or other modern building items or figures.

See the rubric for more information in completing this project.
