

Mobile Project

This project will consist constructing a mobile based on key items, characters or symbols used in the script. There are a number of places online which will assist you in making a mobile.

In choosing the items which will be attached to the mobile, consider those items/things that were mentioned in the script and have a double meaning. For example, the chains that Marley wears represent his past sins or the consequences of his past regrets as well as he is chained to his past actions, so a chain would be a type of item that would work for the mobile.

If you focus your mobile on just one character, consider those items that were uniquely identified with that character.

You could choose to do a mobile that features the various themes or symbols that are present in the story.

Use your imagination in developing your subject for the mobile.

Directions:

The mobile must be able to hang from a ceiling with the attached items in a balance.

The subject for the mobile should be easily viewed at the top of the mobile.

The mobile must have at least 9 related items (including the subject).

See the rubric for further details in constructing this project.
